Dear ,

I read and am interested about your advertisement in website for an Entry-level . Please accept this letter and the enclosed resume as my application for this position.

As a recent graduate of Vks University, I have solid knowledge of a variety of fields, business development , and networking and file systems as well as practical experience in these areas. During my cooperative education placements, I had successful experience in developing ; in fact, during my placement at medical company, my supervisor told me I was the most efficient student programmer he had ever worked with. When my classes required me to collaborate with other students on team projects, I was nearly always asked by my peers to organize the work and present the results. In addition, I found that my problem-solving skills were enhanced by working as part of a team and by considering other people's , while at the same time being a small, focused enterprise. Both of these qualities appeal to me greatly. I am actively seeking the kind of challenge offered by working for a technically innovative firm that is small enough to be flexible in response to the market.

I am eager to have the chance to discuss this position with you in an interview. Please contact me days at 9523216183 . Thank you for your attention, and I look forward to hearing from you.

Sincerely

Jitendra Prakash Sinha
